

JOÃO VICTOR SALES MARCOLIN

joaovictor.salesmarcolin@santannapisa.it

EDUCATION

University of São Paulo - São Paulo, Brazil

Bachelor's degree in Economics

february 2014 - september 2018

My undergraduate thesis relating the changing sectoral composition of employment in Brazil from 2004 to 2013 to contemporaneous changes in the distribution of income was supervised by Professor Fernando Rugitsky and approved with honours.

Master's degree in Economics

february 2019 - september 2021

My master's thesis investigated the effect of negative shocks on the commodity trade on the support for Jair Bolsonaro in the Brazilian presidential election of 2018 and shows that a reduction in employment in commodity production is associated with an increase in Bolsonaro's vote share. It was supervised by Professor Laura Carvalho.

Scuola Superiore Sant'Anna - Pisa, Italy

PhD in Economics

october 2022 - current

I'm currently investigating land-use dynamics and deforestation in the Brazilian Amazon and the Cerrado under the supervision of Prof. Andrea Roventini.

ACTIVITIES

Undergraduate Research Scholarship, CNPq

august 2016 - july 2017

I was awarded an undergraduate scholarship by *Conselho Nacional de Desenvolvimento Científico e Tecnológico* (CNPq) to investigate changes in the Brazilian income distribution.

Teaching Assistant, USP

august-november 2019

I gave a class once every fortnight to two undergraduate classes of Macroeconomics II (open economy and growth models). I was also responsible for the correction of exercises.

Teaching Assistant, USP

february-june 2020

I gave a class once a week to two undergraduate classes of Microeconomics I (consumer demand theory, production theory and partial equilibrium). I was also responsible for the correction of exercises.

Teaching Assistant, USP

august-november 2020

I was responsible for the elaboration and correction of the exercises for a undergraduate class of Social Accounting.

Researcher, Made-USP

may 2021 - september 2022

I was a researcher at the Research Center on Macroeconomics of Inequalities (Made) at the University of São Paulo, where I worked the construction of a narrative-approach database of income tax changes in Brazil.
