PROFILE SUMMARY

Founder and director of Source International, a highly professional with 15 years' experience in Environmental studies, advocacy and Management and Valorisation of Natural Resources; a proven track record of research and environmental impact assessments specifically related to environmental law, human rights, data collection related to extractive industries.

PROFESSIONAL EXPERIENCE

ENVIRONMENTAL RESEARCH

September 2012/Ongoing. Founder and Executive Director of SOURCE INTERNATIONAL, an organization that provides high-level technological and scientific support to communities in Latin America, Asia and Africa, enhancing local capacity in assessing and analysing environmental impact alongside ability to advocate for restorative actions.

- Development of environmental and social monitoring systems
- Capacity building on monitoring systems including data sampling and analysis related to air, soil and water pollution
- Conduct environmental impact assessments, along qualitative and quantitative research methodologies
- Contribute to policy making, and analysis of legal framework and national/international standards for the measurement, management and mitigation of possible negative impacts on communities and the environment
- Support communities in accessing justice and legal remedies concerning human and environmental rights

March 2020/Ongoing. Advisory Board Member of the Sustainable Development Strategy Group

- Provide technical support and expertise in order to achieve the organization's goals of sustainable development and social and environmental justice.

May 2016/Ongoing. Advisory Board Member of the UNDP-Swedish EPA

- Provide technical support on strategy design and programme implementation of the joint global environmental governance programme in Kenya, Mozambique, Mongolia and Colombia with the aim to strengthen human rights based approaches and the rule of law in environmental public administration of mining

March/June 2012. Environmental Researcher and Evaluator for Instituto de Derecho Ambiental de Honduras (Institute of Environmental Rights of Honduras)

- Conduct environmental impact assessment along economic consequences in relation to transnational mining industries operating in the Valle de Siria specifically San Martín Mine

May/June 2011. Environmental Rights Trainer at the Environmental Law Alliance Worldwide (ELAW), (Nicaragua)

- Support local partners in the design and implementation of workshops with indigenous communities, in order to build capacity and raise awareness on the environmental impact of off-shore oil extraction activities in the region

December 2008/March 2009. Environmental Researcher for “Centro de Cultura Popular LABOR” and “CONACAMI” (Peru)

- Conduct scientific analysis on water, sediments and blood sampling in the mining affected area of Cerro de Pasco, in the Peruvian Andes
- Conduct impact assessment on population’s health caused by extractive activities
- Support in advocacy planning

February 2006/February 2007. Environmental Researcher for “Comite ambientalista valle de siria”, “Madreselva”, “Right Action”, (Guatemala, Honduras, El Salvador)

- Support local NGOs in the analysis of water pollution caused by gold open pit mines
- Investigate through qualitative and quantitative research health issues related to the mining activities
- Support actors in advocacy strategy for changes in the national legal framework
