

Id 3690 - CALL: DEVELOPMENT OF AN AGENT-BASED MODEL TO STUDY THE RELATIONSHIPS BETWEEN AGRICULTURAL PRODUCTIVITY, CLIMATE CHANGE AND INEQUALITIES

Position and grant

Scuola Superiore Sant'Anna announces a call to assign one Research Fellowship to perform research activities related to the scientific field SECS-P/02 – Economic policy, at the Institute of Economics. The gross amount of the fellowship is €22.450 per year. The present fellowship cannot be cumulated with other fellowships and grants except those aimed at financing a period of stay abroad necessary within the research activity. The duration of the research fellowship is 12 months, renewable in case of positive evaluation of the research activities performed.

Research Activity

- Research title “Development of an agent-based model to study the relationships between agricultural productivity, climate change and inequalities.”
- Research description “The project will develop a novel agent-based model to study the complex relationships between climate change, agricultural productivity, and socioeconomic inequalities in the context of rural and low-income economies. The model will be informed by data covering crop production, biodiversity, climate and weather conditions, and socioeconomic variables for a set of Global South countries. The successful candidate will contribute to all the steps of the analysis (model development, calibration, validation, and scenario assessment through extensive simulations) and collaborate with an interdisciplinary team to deliver high-impact research publishable in excellent international scientific outlets. Experience with agent-based modeling and spatial data is an asset. Some knowledge of R, Python, Matlab, or C++ is requested.”

Admission Requirements

- Applicants must hold a Master’s Degree in Economics, Agriculture, Environmental and land sciences.
