Istituto TeCIP / Percro Lab – Meeting room 15:00
19th June 2018

Gheorghe Daniel VOINEA
Anabela Gonçalves Rodrigues MARTO

Abstract:
Daniel Voinea and Anabela Marto are currently visiting researcher at PERCRO in the framework of the staff exchanges related to the ongoing e-Heritage project, of which the TeCIP Institute is partner, and for the preparation of future research initiatives
Daniel will describe the current status of the e-Heritage project describing the latest joint research and dissemination activities, in particular focusing on the activities carried out at UTB in Brasov. Anabela will provide an overview of the activities of the Computer Science and Communication Research Center at the Polytechnic Institute of Leira, focusing in particular on her research on Virtual and Augemented reality with a special attention on the application to cultural Heritage

Daniel is a research Assistant at Transilvania University of Brasov, at the Faculty of Mechanical Engineeering, where he is currently involved in a series of research activities including the EU eHeritage project.

Anabela is currently researcher at CIIC in the research group of Computer Graphics and Sound Research and invited Assistant in the Department of Informatics Engineering in Superior School of Technology and Management at Polytechnic Institute of Leiria
